

# GENERAL SAFETY INSTRUCTIONS

## PiXL and PiXL PRO

To avoid injury to you and others - and avoid damage to the device, please comply with these instructions. If any of these instructions comes as a surprise to you, please consider to refrain from using any electronic devices at all.

Do not put your hands inside the device at any time.

Device and power cable must be kept away from children and mentally disabled. It is not allowed to play with the device.

Disconnect the power supply during thunderstorms.

Disconnect the power supply from electric voltage if it is unattended for a longer period of time.

Disconnect the power supply before cleaning the device AND do not use any liquid or spray cleaner - use a dry cloth only.

Do not use the device in the vicinity of water.

Do not expose it to a humid environment.

Do not pour any liquids over the device.

Do not block or cover any holes in the housing. These are essential for the airflow and protect the device from overheating.

Do not insert any objects into the holes of the device as these could get in contact with live parts or could cause short circuits, fire and/or an electric shock. The reset button must be used with care.

Do not place any objects on the power cable.

Protect incoming and outgoing cables from being walked on or pinched, particularly at the connector and where the cables exit the device.

When using an extension cable, make sure the rated output of all devices connected does not exceed the maximum rated output of the extension cable.

Do not support yourself on the device.

Do not place any heavy objects on top of the device.

Do not use excessive force on buttons, switches or connectors.

If the power cable or the main power plug is defective, let a qualified technician replace it immediately.

Place the device on stable surfaces only. If it is placed on unstable surfaces, it may fall and break.

Only use power cables which are safety-marked.

Do not use any high-power walkie-talkies or cell phones near the device.

The device is only to be used with safety outlets.

The enclosure for the PiXL-series is made from aluminium. Other substances that could induce an allergic reaction cannot be generally excluded in the production of this product.

If you develop an allergic reaction (such as a skin rash, frequent sneezing, red eyes or respiratory difficulties), consult a physician to determine the cause.

If one of the following conditions occurs, disconnect the main power plug and call your local distributor or the technical support.

- Power cable or power plug is damaged or worn.
- Ingress of liquids.
- The device was exposed to rain or high ambient humidity.
- The device does not function properly, even if you followed all the instructions of this manual. Only operate the device as stated in the manual. Incorrect operation may damage the device.
- The device fell damaging the housing.

# INTENDED USE AND SAFETY

The  $\pi$ XL and  $\pi$ XLPRO controllers are intended to control  $\pi$ XLine connectors with LED pixel strip output based on incoming ArtNet-data in a network environment.

This device is intended for professional use only and is not suitable for residential use.

The  $\pi$ XL series and all accessories are intended for indoor use and in permissible environmental conditions only.

Installation and connection of the devices are explicitly to be carried out by trained personnel in compliance with all local safety regulations.

Any change or modification to this device could void the users possibility to operate it safely and is therefore not permitted.

## Risk of electric shock and electric current

The device is to be repaired and/or serviced by qualified service technicians only as live parts may be exposed when opening and/or removing coverings. Touching live parts may cause electric shock.

This device has to be grounded when installed and/or operating.

A defective device or a defective power cable can cause severe or fatal injury due to electrical shock. Follow the safety instructions to avoid the risks caused by electric current.

- Only connect the device to an outlet with a preliminary fuse.
- Do not use a defective power cable.
- Do not open screwed down covers from the housing.
- Use the device only if it is in a technically impeccable condition.
- Do not repair the device on your own.
- Do not reverse engineer the device and/or make any changes to its components and/or accessories.
- Do not expose the device to rain or moisture.
- Do not submerge the device in water.
